### How Supplied

Powder: 454 grams per bottle

Capsules: 270 capsules per bottle / 800 mg per capsule

### Instructions on Use

Powder: 1-2 tsp, 3 times daily, added to warm water, juices, blended drinks and foods

Capsules: 1-6 capsules, 3 times daily, with liquids

## Product Information

Pecta-Sol® Modified **Citrus Pectin** is a complex polysaccharide (long-chain carbohydrate) obtained from the peel and pulp of **citrus fruits**. It is valued for its galactosyl component, which was studied in the research of Dr. Kenneth J. Pienta, MD.

This galactosyl component of Pecta-Sol® Modified **Citrus Pectin** is the key to its role in maintaining good health. This essential component is known for its ability to interfere with the **binding** properties of cancer cell-surface proteins called galectins. This prevents tumor cells from adhering to each other or to the inner wall of blood vessels. To assure you of the highest quality product, Pecta-Sol® is the only brand of Modified **Citrus Pectin** that has been clinically tested.

Certain cells of the prostate, breast, colon, lymphatic system, skin, brain, and larynx, have on their surface specific proteins called carbohydrate-**binding** galectin-3. The galactosyl component of Pecta-Sol® Modified **Citrus Pectin** has an affinity for those **binding** sites. Pecta-Sol® provides these unique galactosyl components to help optimize immune function and maintain optimal health.

Modified **Citrus Pectin** is also recognized for its ability to promote normal cholesterol levels. **Pectin** supplementation causes significant decreases in total cholesterol, low-density lipoprotein cholesterol, apolipoprotein A & B and lipoprotein (a).

## Unique Benefits & Characteristics

Ordinary **pectin** is not absorbed into the bloodstream because of its long molecular chain. But in the making of Pecta-Sol® Modified **Citrus Pectin**, a special manufacturing process creates a shorter molecular chain. This allows absorption and utilization of the crucial polysaccharide compounds. Only Pecta-Sol® Modified **Citrus Pectin** provides these compounds in the optimal molecular weight, pH, and methylation specifications defined by published research.
